ABOUT US

Born from a shared vision to transform spaces into stories, The Creative Design was founded by **Raissa**, an architect and interior designer, and **Juliana**, an engineer—friends for more than 16 years who share a deep passion for meaningful design. After years of working in leading corporations and gaining experience across different countries, we united our skills in Dubai’s vibrant construction market to build a studio driven by creativity, expertise, and purpose.

With our expertise and experience, we know that a truly beautiful space goes beyond aesthetics — it enhances daily life. Our mission is to design environments that embody elegance, functionality, and comfort, while making the entire process seamless and inspiring for our clients.

DESIGNS THAT SPEAK THROUGH OUR CLIENTS.

Sunita Nair

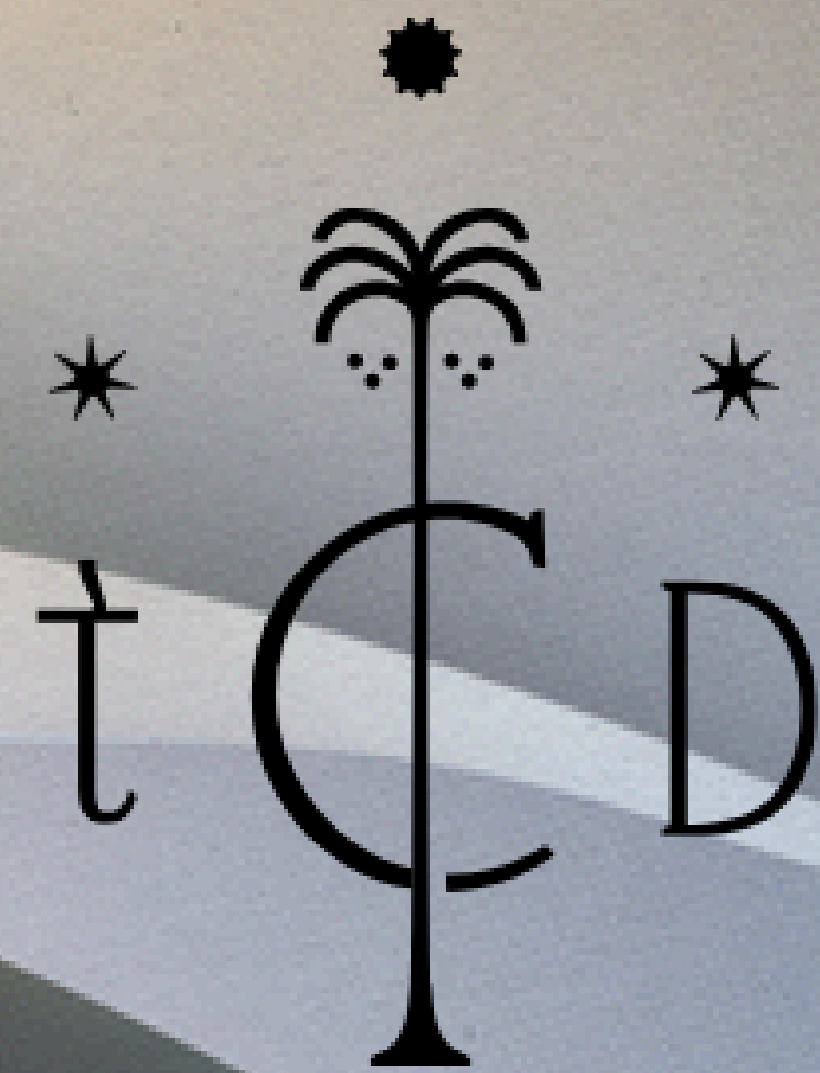

A big THANK YOU to The Creative Design for helping in furnishing our new home so beautifully. I would highly recommend their services — they are friendly, affordable and professional.

Ana Lucia Sardenberg

What to say about someone's work of art, that becomes your very favorite spot in your new home? Amazing work, attention and care for what we wanted. Always listening to our needs and giving us great options and solutions. They've done our wonderful kitchen and our son's amazing, unique, huge metal loft bed — definitely one of a kind. Everyone who visits our new home falls in love with both of their projects. We absolutely love their work and couldn't ask for more!
